D400 (Group 4)

MaxiGrip™ Endurance™

D400

Ductile Iron Access Cover

Ductile iron access covers, suitable for use in areas where cars and lorries have access, including carriageways, hard shoulders and pedestrian zones. Capable of withstanding a 400kN (40 tonnes) test load.

OPTIONAL EXTRAS:

- Badged
- Locked
- Vented
- Sealing Plate
- Security Plate
- Safety Grids
- Security Locking

SmartGrip Technology™ - Unique pattern design provides a PSRV value of >70 (UKAS Accredited 3rd Party).

Recyclable - Long life asset with high circularity contributing to the reduction in carbon footprint.

Coating - Black coated finish.

Ratio - Ductile iron for improved weight to strength ratio.

Depth of Insertion - Meets the depth of insertion requirements of BS EN124-2:2015, CD534 and BS7903

Three Point Suspension - Three point suspension for non rock stability.

Kitemark - Exceeds the requirements of BS EN124-2:2015, tested and certified by BSI.

Complies with MCHW - Manual for Contract Highway Works, Series 500.

Complies with DMRB - Meets the requirements of Highways England specification CD534.

Strong & Durable - Spheroidal graphite cast iron according to EN 1563:2018, as per the requirements of BS EN124-2:2015.

ADDITIONAL FEATURES:

Ergonomic Frame Design - Due to the enhanced rigid frame design, the frame requires no gussets and has reinforced corner areas to increase the structural integrity of the frame.

Low Wear Inverted 'V' Seatings - Allows the dynamic loads in service to be distributed more evenly across the frame geometry, preventing concentrated stress points.

Intelligent Lifting Points on Frame - Incorporated lifting points to provide a balanced lift as specified in BS7903:2020 clause 6.19; the underside of the lifting points are recessed to engage with the bedding material and encourage superior adhesion.

Flange Bearing Area - All Endurance D400 (group 4) products exceed the minimum specified flange area of 190,000mm² as specified in DMRB CD534 V 0.1.0 (table 2.10b)

Integrated Bedding Mortar Indicator - Ensures that bedding material envelops the flange to the minimum requirements, can be used in conjunction with our Evev8 levelling system when using flowable bedding mortars.

Elev8™ Frame Levelling System - Provides adjustment of the frame during installation to facilitate bedding mortar from 10mm to 50mm depth.
